

Alan Perlstein Professional Biography

Alan Perlstein
President
ATMAN Management & Systems Specialists Inc.

Alan Perlstein is the founder and President of ATMAN Management & Systems Specialists Inc., a management consulting corporation established in December 2011. ATMAN Specialists is dedicated to supporting successful growth of corporations, through organic efforts in the marketplace; assisting in winning key major proposals and putting systems, processes and trained personnel in place for successful program execution.

Alan has 35 years of experience in ship building, power electronics, design development and program control functions. He has been responsible for the design development, contract administration, business planning and program control functions for navy nuclear, ship controls, propulsion and power distribution programs. He has lead the development of systems and processes for advanced business planning to ensure affordable solutions in high quality, low rate production and design development environments.

Prior to founding ATMAN Specialists, Alan worked for DRS Power and Control Technologies (DRS PCT) for 12 years. His most recent assignment was Vice President/General Manager of DRS PCT, growing the business and jobs in the Milwaukee, Wisconsin facility by in excess of 30% from 2008 to 2011. His previous positions at DRS include VP of Programs for DRS Power Systems, responsible for Program oversight at 6 geographic locations in WI, CT and MA, VP of Innovation and Planning at DRS PCT.

Prior to joining DRS Alan worked for General Dynamics for 20 years in various capacities, with his last assignment being the program planning and business manager responsible for Virginia Class programs. He was responsible for customer interface, development of long lead funding profiles, and creating the program scheduling and cost management systems that have made the Virginia Class ship building program the most successful recent US Navy ship program.

Mr. Perlstein is a graduate of the Kellogg School of Business at Northwestern University, with a Masters in Business Administration, and of American University, with a Bachelor of Science in Economics. He is past Chairman and a Founder of the Wisconsin Energy and Research Consortium, a public private partnership of Academic and Industrial partners focused on Power, Energy and Control Technologies and Business growth. He is a Board member of the Northwest Side Community Development Corporation, a No-profit community development corporation focusing on economic development in the 30th street corridor of the City of Milwaukee.
